Master Class in Change for Sustainability

Increase your effectiveness in working with the risks and opportunities associated with sustainability

You are already committed to making change. You have knowledge and experience. But now you want to learn the tools, techniques, and processes that will empower you to accelerate transformation.

Why choose us?

We have worked with dozens of leading organisations to advance sustainability, around the world, since 1992. The ISIS Academy Master Class brings years of sustainability training and experience into laser-like focus over a 2-1/2 day period. Our unique blend of tools, methods, inter-active exercises, and professional self-exploration will inspire you and lift your capacities.

Alan AtKisson, Axel Klimek, and Fiona Ellis will guide you through theory, reflection, and practice, working in teams and individually, at beautiful St. Hilda's College, Oxford University.

You'll go home refreshed, renewed... and equipped with new tools and insights to make change happen.

“ *Extremely useful...* ”

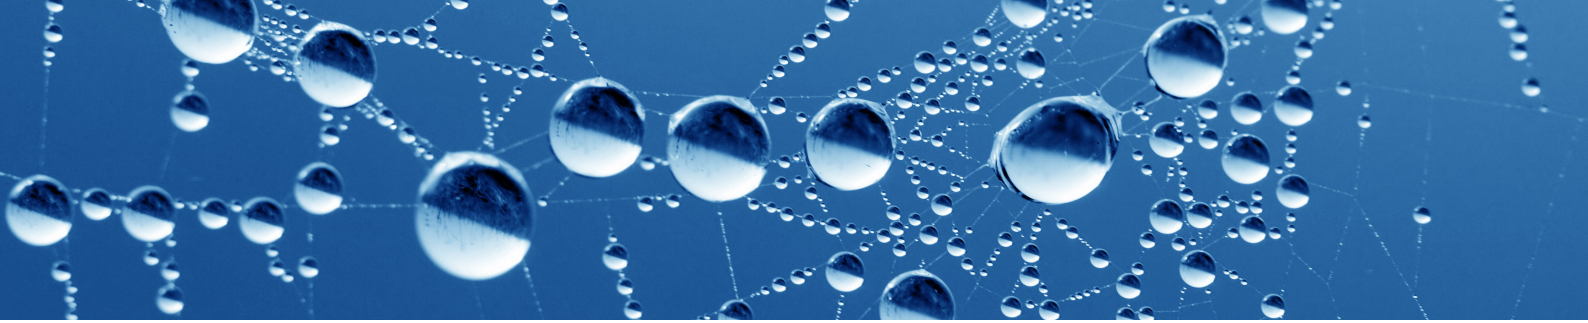

“ *Great atmosphere!* ”

“ *A perfect mix of learning, application, and dialogue...* ”

“ *Highly empowering material...* ”

“ *I feel strengthened, inspired, and best of all, hopeful about my future...* ”

The number of spaces in the Master Class is limited. Please secure your place by registering early.

Objectives of the Master Class

Participants will learn:

- Master the ISIS Method and Accelerator Tools
 - Learn to work with Indicators, analyse Systems, develop Innovations, and plan Strategy for sustainability – and to lead others in the process
- Build Professional Skill as a Change Agent
 - Develop your own sense of Authority, Presence, and Impact (API)
 - Practice coaching others to support high-performance change
- Develop New and More Effective Strategies for Change
 - Discover new leverage points for transformation in complex systems
 - Create action pathways to affect those leverage points more powerfully

Pre-requisite for the Master Class

You should have basic familiarity with the concept and goals of sustainability, some professional experience, and a sense of clarity that you are ready to take the next step in your sustainability career - and become a more effective agent for change. We also recommend reading Alan AtKisson's book *The Sustainability Transformation* in advance of the class.

Graduates will receive a certificate indicating that they have undergone advanced training in sustainability change management.

Start: 13th March 2013 at 10 am

The team of trainers, which will assist you in this Master Class

Axel Klimek (Germany)

Co-founder and managing director of ISIS Academy GmbH, a senior management consultant with high-level experience in Europe, Asia, and Africa, helping organisations and developmental programs. He has managed complex change processes and worked for more than 25 years as a coach as well as a trainer for coaches.

axel.klimek@isisacademy.com

Alan AtKisson (USA, Sweden)

Co-founder of the ISIS Academy GmbH, a senior strategic consultant, professional trainer, and author in the field of sustainable development. His book “The Sustainability Transformation: How to Accelerate Positive Change in Challenging Times” has been widely used by practitioners and academics in the field of sustainable development. Recognised as one of the pioneers in sustainability consulting (since 1992), he has helped to develop the field as a profession.

Fiona Ellis (United Kingdom)

Fiona is a director at Bath Consultancy Group, a global leadership and change consultancy and she is an experienced consultant, coach and designer of development approaches. She has a strong, calm, facilitative style, and enjoys working closely to support internal consultants, drawing on her own experience as an internal consultant for ten years. She consults to a range of organisations internationally across the private and public sector range of work including leadership development, working with culture change, whole systems transformation, HR development, action learning, and team development. She has a passion for sustainability and using change approaches to embed sustainability through leadership and culture change.
